Whether you are purchasing telephones on behalf of a telephone administration, a business user, or require a single telephone for the home, the Series 700 range of instruments offer a sound investment.

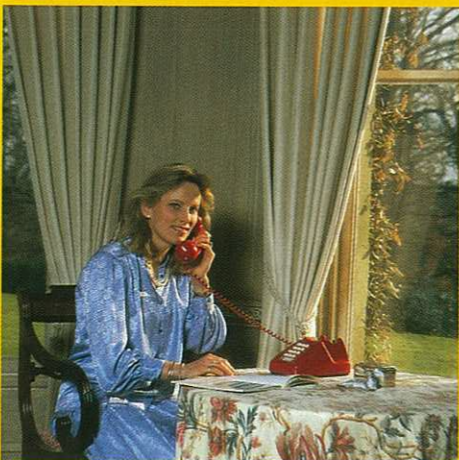

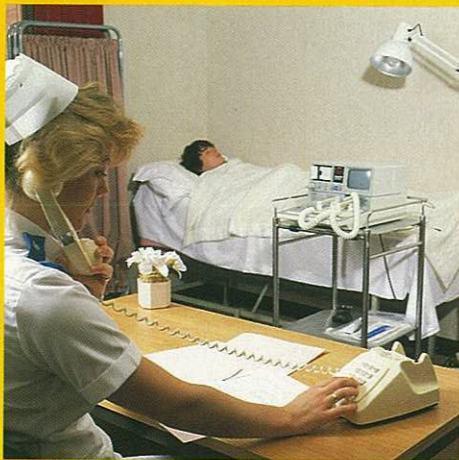

Designed and built to the rigorous standards of British Telecom and used by both state and private telecomms operators on all five continents. Series 700 has forged its own excellent reputation as a world class range of telephones.

King of them all is telephone No. 782 – not a name but a number. A telephone compatible with the world's most up-to-date digital electronic exchanges using the international standard DTMF signalling.

Designed for both aesthetic appeal and contemporary looks, tele 782 was ergonomically evolved to be pleasant to hold and easy-to-use. Light and convenient to carry yet stable enough for table top use, the instrument suits all applications. Available on British 'New Plan' system or 'hard wired' for export.

Two simple brackets are available for wall mounting and allow users to rest the handset if they need to leave the phone during a call. The recall button is prominently located. Optional earth or timed-break recall.

Choosing your tele 782 is like acquiring a top luxury car, your list of optional extras is almost endless...

#### Facility buttons

Up to 4 buttons provide access to literally hundreds of standard or custom built facilities.

#### Transmitter

Standard electronic transmitter [no 21A] provides un-rivalled transmission quality for life. Optional confidencer microphone offers discreet conversation ideal for dealing houses etc.
